

cover pdf

Your cover artwork must be supplied as two spreads as per the diagram on the right.

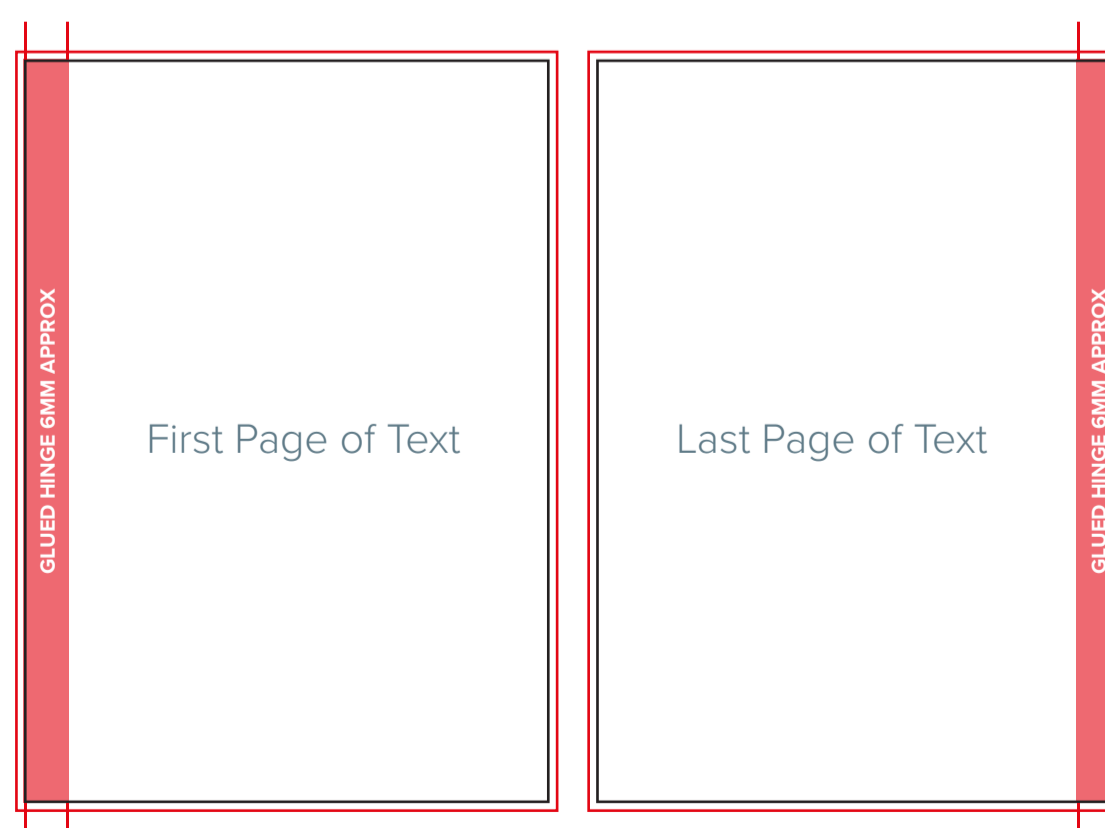

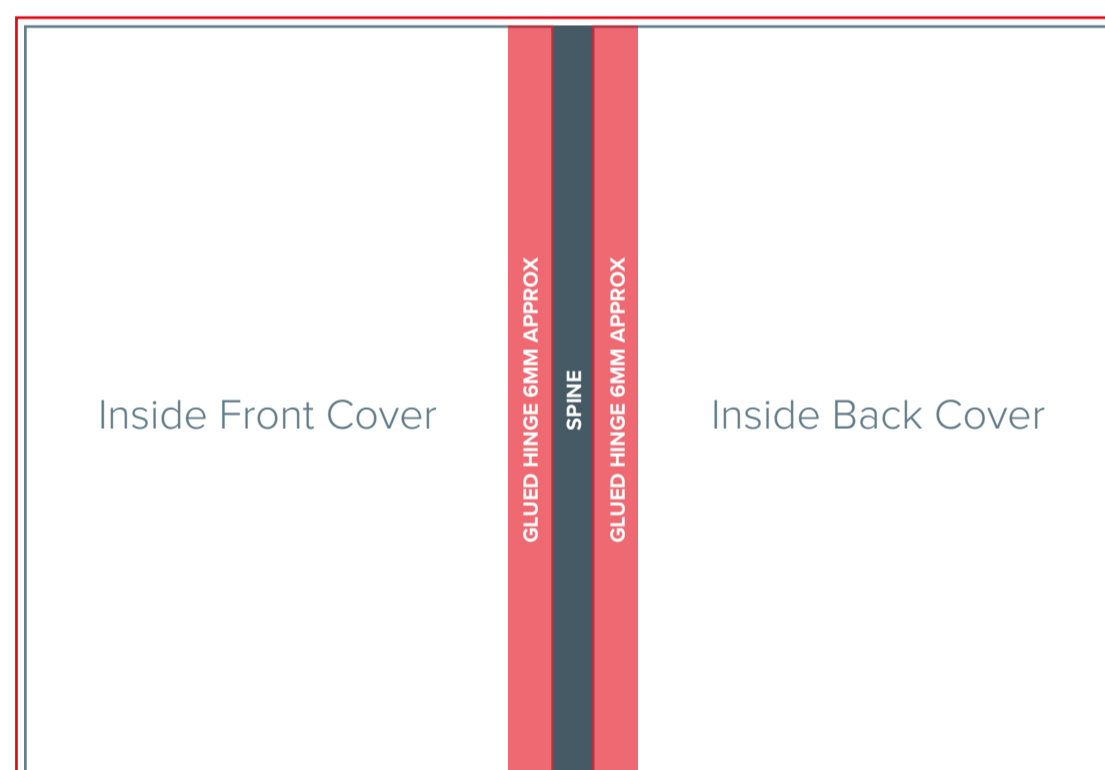

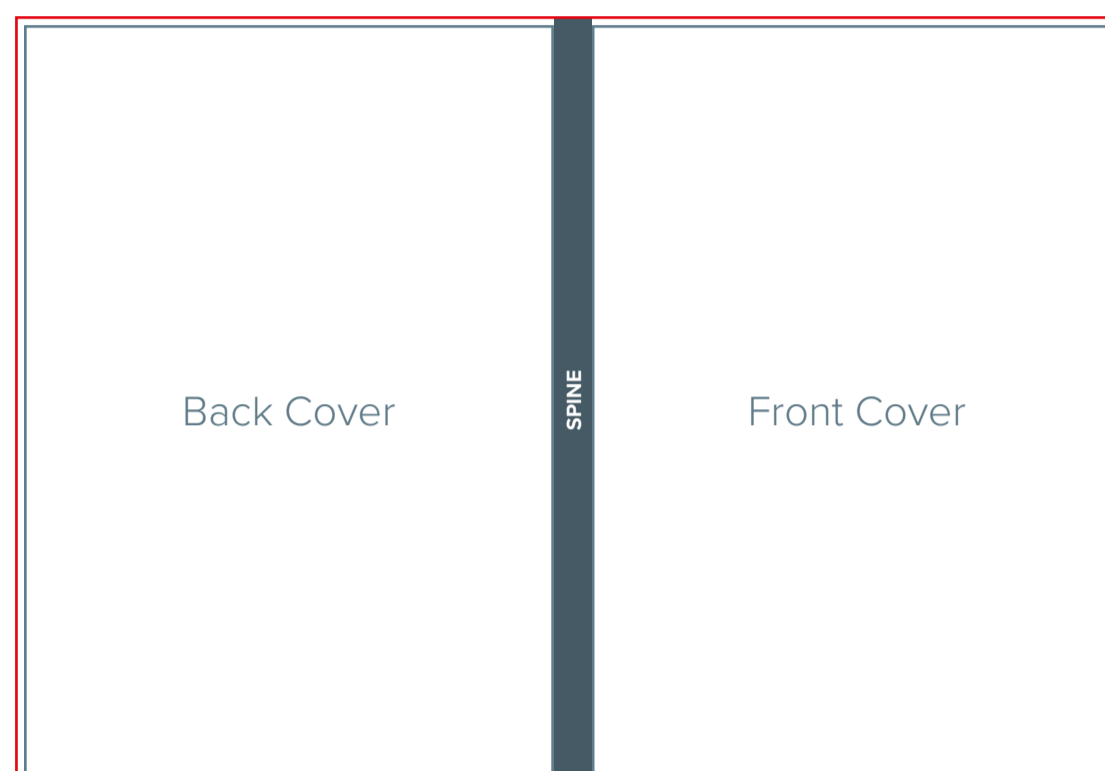

Please ensure your cover PDF includes the following:

- Trim marks
- A minimum of 3mm bleed
- Outer cover spread with spine
- Inner cover spread with spine

Cover Dimensions

To calculate the width of your spine and overall cover size, please enter the specification of your Perfect Bound Document on the following page of our website:

<https://printedeasy.com/products/perfect-bound-brochures/>

text pdf

Please supply a multipage PDF as single pages, complete with the following:

- Trim marks
- A minimum of 3mm bleed

perfect bound cover read across set up

inside cover read across correct set up

If you have an image that reads across from the inside front cover to page 1 of your text, please set up the pages as follows:

- Inside front cover images should be moved 6mm to the left (bleed still required), to avoid the cover hinge (see image Fig 1.1).
- Page 1 of text images should be moved 6mm to the right (bleed still required), otherwise the image will be covered by the cover hinge (see image Fig 1.2).
